

## Your PLUS for interaction

The Flystick2+ is our newly introduced wireless interaction device for your VR applications with a protected passive target. Flystick2+ provides audio & vibro-tactile feedback.

It further comes with additional hotkeys and exchangeable front cones.

Key features such as analog trigger, USB Type C charging, predefined hand grip and multipurpose wall mount enhance the comfortable handling of device.

The wireless data transmission to the controller is guaranteed by a USB radio transceiver in the ISM band.

Flystick2+ data can be received by trackd, VRPN, VR Juggler and most applications with direct interfaces.

## Technical Data

Performance	
Tracking range (@ 3.5mm focal length)	approx. 4 m
Radio range (depending on setup location, e.g. walls)	at least 7 m
Radio module	
Type ID	IEEE 802.15.4 Zigbee LR-WPAN
Frequency	ISM band: 2.4 GHz, 8 channels
Transmission power	4 dBm
Power Supply	
Rechargeable batteries	standard batteries 2xAA
Continuous operation <sup>1</sup>	at least 80 hours
Battery charging duration	5 hours
Operation possible with connected charger	yes
Dimensions	
Size	183 x 188 x 99 mm
Weight	250 g
Compliance	
FCC CFR47 Part 15 Subpart C	
CE	
TÜV SÜD NRTL	

<sup>1</sup>only valid for new batteries
